

# RCKT.

## **(EN) WORKING STUDENT/INTERN DIGITAL ECOSYSTEMS (m/f)**

We are looking for working students/interns for the "Digital Ecosystems" division. Are you following developments in the international market, interested in start-ups and new technologies and business models? With RCKT you get the opportunity to build up a new service within the framework of your own project and to contribute your expertise in these areas.

### **Your tasks:**

- Independent research and analysis of markets and industries as well as trend and innovation scouting from internal and external sources and preparation of the results
- Support in data analytics and intelligence as well as data validation
- Independent development of processes for data maintenance and processing

### **Your profile:**

- You are a team player with a positive attitude and are always open towards new tasks
- You are hands-on and are enthusiastic about startups and innovative business ideas
- You have a good understanding of business contexts as well as tech and digital trends
- You are self responsible and have the ability to quickly understand complex contexts
- Advanced skills in working with MS Excel, experience in database maintenance is an advantage
- Fluent in English
- You have a university degree and, at best, some work experience (including internships) in the relevant areas

### **Our offer to you:**

At RCKT you not only get an international team full of great colleagues with that special entrepreneurial spirit and a cereal flatrate. By working with the most important players in the digital economy on a daily basis, you are always up to date and are the first to know what's new. RCKT offers you the chance to further develop your skills and develop yourself personally in a very dynamic environment. You work in an open, inspiring environment and actively contribute to our special team spirit.

If you would like to apply, please send your application to [join@rckt.com](mailto:join@rckt.com).

We look forward to meeting you!
